

► Commvault IntelliSnap for NetApp

SNAPSHOT MANAGEMENT MADE EASIER

WHY SNAPSHOTS? Explosive data growth and server virtualization have complicated traditional backup and recovery. Backup windows have decreased while the time it takes to perform a backup has increased. This makes meeting recovery objectives challenging.

High-speed NetApp® Snapshot™ technology can help address stringent RTO/RPO SLAs, but managing Snapshot copies separately from traditional backups typically required complicated scripts or Snapshot copies were not fully cataloged for easy search and retrieval.

THE SOLUTION Commvault IntelliSnap for NetApp software integrates with NetApp Snapshot technology on NetApp AFF and FAS storage to reduce protection windows and enable faster recovery using a single management interface. IntelliSnap for NetApp utilizes controller-based pricing (not capacity-based) to simplify licensing and can export data from Snapshot copies to tape using automated policies.

BENEFITS INCLUDE:

- 1 Shorter Protection Windows** Low-impact, array-based NetApp Snapshot copies and replication can reduce protection windows from hours to minutes without a performance penalty or system overhead.
- 2 Faster Data Recovery** Recover data in minutes, not hours, by using high-speed Snapshot and replication copies that are fully cataloged and indexed for rapid search and accessibility in the event of a recovery.
- 3 Unified Management** Respond faster to requests and reduce costs by managing and monitoring Snapshot copies, replication, and tape backup processes from a single interface, and use automated policies to manage data retention across storage tiers.
- 4 Virtualization and Application-Aware** Minimize downtime and prevent data loss through integration with virtualization and major applications to provide application-consistent recovery in minutes.
- 5 Lower Costs** Lower backup disk capacity utilization by up to 90% and significantly reduce network bandwidth usage with industry-leading storage technologies.
- 6 Easy Expandability** Purchase additional Commvault licensing options for use in the same Commvault environment (CommCell) such as streaming backup with deduplication, data archiving, laptop/desktop backup, and more.
- 7 Industry-leading Support** Commvault's support organization has an industry-leading 98% customer support satisfaction rate.¹
